

Enterprise IP Solutions

## OfficeServ 7030

The agility and responsiveness of small businesses is a major competitive advantage. However, technology and professional support tools that enable people to communicate and collaborate efficiently are often priced beyond what is cost-effective and viable for smaller companies. But now, even the smallest business can afford the same sophisticated communications technology normally only enjoyed by large companies, configured to suit small company productivity, flexibility and budget requirements.

### Simplicity and Sophistication

As part of Samsung's OfficeServ 7000 range of converged communications solutions, the OfficeServ 7030 Converged Communications Server has exactly the same pedigree, same features and same handsets, but is specifically designed for small businesses that need a sophisticated communications solution that's also simple to implement and manage

The OfficeServ 7030's all-in-one, compact design has been engineered to deliver a highly affordable, easy-to-use and secure IP platform for fully integrated voice, data and wireless communication. With the support of a full set of advanced features and sophisticated applications, such as Voicemail and Auto Attendant, the OfficeServ 7030 also enhances staff performance and delivers substantial cost savings.

### Advanced Communication Solutions

The OfficeServ 7030 offers the small business, a host of sophisticated standard and optional features. Designed for ease of use, most features can be used with a simple touch of a button, allowing users quick access to the systems comprehensive functionality.

### Flexible and Easy to Grow

The OfficeServ 7030 is very flexible and can grow with you, so whether you have a single business, multiple business and want the freedom to operate your business anywhere in the world, the OfficeServ 7030 delivers the same power and benefits to you as the larger, much more expensive telephone systems.

As your business demands it, VoIP applications (IP phones / IP networking / remote workers) and wireless technology can be enabled to provide a powerful converged solution for voice, wired and wireless phones, faxes and modems.

The OfficeServ 7030's modular architecture, common software and handsets ensures full scalability and interoperability between systems, enabling easy expansion and networking with larger systems in the OfficeServ 7000 range.

Working With You to Unify Your Communications

# Samsung OfficeServ 7030

## Big Features. Small Budget.

- Automatically displays caller ID and number dialed information
- Sophisticated, low cost voice mail with e-mail integration
- Automated Attendant, Uniform Call Distribution (UCD), and Call Queuing with comfort messages ensures calls are handled efficiently.
- Cost effective IP trunks using industry standard SIP protocols
- Easy to deploy IP extensions for remote workers and/or other offices
- DECT for wireless voice
- Computer Telephony (CTI) Applications for seamless PC and telephony integration.
- Mobile extension functionality allows mobile phones (or other numbers) to be seamlessly paired with desktop phones
